

WEB DESIGN AND PROGRAMMING ACCOMPLISHMENT REPORT

Name: Harvie Tan Section: 2-IT4
Group Number/ Project Title: G8/FoodSpot

I successfully led and completed the basic web page interactives by the use of Javascript. I made every navigator move to its section and the scroll to top button that scrolls up. This the part of the web development that I find the most difficult one. Also, I implemented some AI generative codes but as usual, I modified it. By using AI tool, some of my codes fixed.
