

WEB DESIGN AND PROGRAMMING ACCOMPLISHMENT REPORT

Name: Neil Genrei C. Casao Section: 2-IT4

Group Number/ Project Title: Group 8/FoodSpot

On the making of the project the accomplishments that I have contributed were in redesigning the food menus by making it much easier to navigate the designated food with its simple design allowing the customer to consume less time in finding the right food. We also redesign the information contact with simple looks and give it a light color which is soothing making it gives small attention to remembering the information contact of FoodSpot making it easy to contact with customers.
